About HYBRID Application Training

Hybrid application development is one of the most looked-for skillsets these days, developing one application for all mobile platforms. Hybrid applications are web applications (or web pages) in the native browser, such as UIWebView in iOS and WebView in Android. Hybrid apps are developed using HTML, CSS and JavaScript. In this program, we will learn Ionic - a framework used for developing such applications. We will be building an entire application which will run on all mobile devices.
